Editorial

Indian subcontinent is well respected for its growing research activity in the geosciences, particularly in circum-Himalayan earth science. Pakistan Journal of Geology (PJG) is the peer-reviewed journal of the geologists in Pakistan. The PJG publishes scientific papers, notes, and discussions in the broadly defined fields of geoscience that are related to the geology of Asia. Contributions from Europe and Middle East and Africa are also welcome due to strategic location of Indian subcontinent as well as topical studies on any geoscience-related discipline. Production, publication, and distribution of the PJG are managed by the Zibeline International Publishing. The subject matter includes geology, geophysics, physical geography and pedology. Prospective contributors should consult recent issues of the journal and see whether a planned submission is appropriate. All research articles in this journal have undergone rigorous peer review, based on initial editor screening and single-blind refereeing.
